Bill", "Sitzler, David", "Gaudette, Brittany", "Lacewell, Billy",
"Barnes, Melanie G"

History: This message has been replied to and forwarded.

Attached are 3 sets of comments from DOI, two from USGS and one from Rick Newill, our contractor. I believe that they are pretty consistent and don't conflict with one another to any significant degree. We hope they are useful in charting a course forward to obtain the kinds of information we feel are essential to answering the key questions regarding contaminant pathways. Feel free to contact the provider of the individual comments if you need clarification, et cetera. I have provided their contact information on their comments. Let me know if you have questions.

Steve
